Scope of the Journal

ISSN: 2053-0811 (Print), ISSN: 2053-082X (Online)

With the Age of Big Data upon us, we risk drowning in a flood of digital data. Big data spans five dimensions (volume, variety, velocity, volatility and veracity), generally steered towards one critical destination - value. Big data has now become a critical part of the business world and daily life. Containing big information and big knowledge, big data does indeed have big value. IJDS confronts the challenges of extracting a fountain of knowledge from "mountains" of big data.

Topics covered include:

- Big data cloud, mining and management
- Big data storage, processing, sharing and visualisation
- Big data systems, tools, theory and applications
- Business analytics, intelligence and mathematics
- Computer science, hacking skills
- Informatics and information systems and technology
- Machine learning, web-based decision making
- Management science, social sciences and statistics
- Mathematical optimisation and mathematics of decision sciences
- Multiple source data processing and integration
- Network and social-graph analysis
- Optimisation, performance measurement
- Security and privacy
- System analysis and theory
- Volume, velocity and variety of big data on cloud

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijds where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out about how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.

This title is part of the Computing and Mathematics Collection (see www.inderscience.com/cm). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
