Scope of the Journal

ISSN: 2040-2252 (Print), ISSN: 2040-2260 (Online)

IJEDPO publishes original contemporary research with substantiated and well-reasoned supporting evidence showing potential for advancing industrial practice and strengthening current theory. It boasts a broad coverage of applied experimental statistics and experimental design for understanding and enhancing processes or systems in the physical, chemical and engineering sciences, and for addressing cross-disciplinary issues in quality, manufacturing, healthcare, human factors, pharmaceuticals and service systems. While encouraging a broad spectrum of contributions, IJEDPO's core interest lies in statistical modelling/optimisation issues for process improvement.

Topics covered include:

- Design of experiments and data analysis, experimental statistics
- Quality by design, quality control and engineering
- Robust design and multi-parameter multi-objective optimisation
- Manufacturing processes design and optimisation
- Mechanical engineering, materials processing, modelling and simulation
- Industrial engineering and operations research
- Bioengineering, healthcare systems and pharmaceuticals
- Optimisation for additive manufacturing, fibres and textiles
- Decision making under uncertainty
- Multidisciplinary research

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijedpo where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.
