for Vehicle Design

# Scope of the Journal

ISSN: 1742-6952 (Print), ISSN: 1742-6960 (Online)

*Changes in the global transportation landscape have engendered modern organisational objectives of improving revenue by working with just-in-case inventories, achieving minimal carbon footprint, increasing global presence and enhancing logistics efficiency. In light of these developments, IJET envisages innovation and improvements in applications of information and communication technology (ICT), RFID technology, global positioning systems (GPS), electronic road pricing (ERP) and barcode technologies in the logistics and transport sector, thereby improving supply chain efficiency by reducing carbon footprint, inventories and costs.*
