Scope of the Journal

ISSN: 1743-5099 (Print), ISSN: 1743-5102 (Online)

IJFSE proposes and fosters discussions on the definition and identification of methods, techniques, approaches, patterns and tools for systemic analysis and investigation of software failures encompassing the retrospective analysis of the impact on processes for software products and systems specification, design, development and maintenance.

Contents:

IJFSE publishes original research papers, technical and experience reports, case studies and conference reports. Special Issues devoted to relevant topics in related research areas will occasionally be published.

Topics covered include:

- Software defect analysis methods and tools
- Mathematical and statistical models for data analysis and correlations
- Formal methods
- Product and process metrics collection and analysis
- Simulation techniques and environments
- System and service engineering
- Systems and services science
- Software integrity
- Domain-specific software engineering techniques and languages
- Novel software engineering methodologies
- Software development environments and CASE tools
- Software testing, analysis and verification
- Software understanding and reengineering
- Measurement, metrics, estimation methods, and empirical studies
- Software quality assurance

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijfse where you can:

- Read about the journal's aims, scope and readership
- View editorial board details
- Find out about calls for papers and how to submit
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.
