# Scope of the Journal

ISSN: 1758-8715 (Print), ISSN: 1758-8723 (Online)

*IJIEI stands at the forefront of cutting-edge research, offering a comprehensive platform that transcends traditional disciplinary boundaries to explore and advance the ever-evolving realm of intelligent systems and informatics. This multidisciplinary journal serves as a nexus for scholars, researchers and practitioners from various domains, fostering a rich exchange of knowledge, ideas and innovations across a spectrum of fields, including artificial intelligence, robotics, computer science, cognitive science, intelligent control, Internet of Things, software engineering, information technology, computational intelligence and reinforcement learning.*

## Topics covered include:

- Artificial intelligence, robotics and autonomous systems
- Big data analytics and data mining
- Bioinformatics, computational biology and healthcare informatics
- Cognitive science, human-machine interaction and knowledge processing
- Computer vision, image and signal processing, and perception and sensing
- Computational intelligence, fuzzy logic and swarm intelligence
- Control theory and intelligent control systems
- Cyber-physical systems and Internet of Things
- Decision support systems and expert systems
- Deep learning, machine learning and neural networks
- Distributed computing and multi-agent systems
- Energy management, smart grids and environmental monitoring
- Evolutionary computation and genetic algorithms
- Real-time intelligent automation and reinforcement learning
- Smart cities, urban informatics and software engineering
