Scope of the Journal

ISSN: 1751-3227 (Print), ISSN: 1751-3235 (Online)

IJISAM publishes high-quality articles that involve significant analytical modelling and have relevance to information systems and management science. The journal invites articles concerned with the use of mathematical and economic modelling for information systems and related fields, such as e-business and sharing economies. Analytical modelling can involve continuous, discrete and stochastic optimisation, dynamic programming, stochastic processes, simulation, game theory, decision theory, and so on. Contributions to mathematics that have special relevance to management information systems research are encouraged.

Topics covered include:

- Architectures/infrastructures, agent/intelligent/knowledge-based systems
- [Bio]medical informatics, social informatics
- Collaborative work systems/management, human factors
- Data mining, knowledge discovery, data warehouse, OLAP, ontologies
- Database architectures/applications, decision support systems
- Enterprise/executive information systems, ethics in IS
- Functional information systems, impacts of information systems
- IT globalisation, interorganisational systems, e-commerce, virtual business
- ICTs, media, communications, emerging information technologies
- IS education, outsourcing, performance, planning, quality, security, theories, models
- Knowledge management, organisational learning, knowledge networks
- Management information systems, management of information resources
- Metrics/benchmarking, capabilities evaluation, research methods
- Software process/project management, workflow management
- Strategic IS, IT valuation, information economics, competitive advantage
