Scope of the Journal

ISSN: 1479-3121 (Print), ISSN: 1479-313X (Online)

IJISCM covers information systems and change management theories, methodologies, modelling, processes and tools, highlighting management, problem-solving and strategies for dealing with business changes. Information systems increasingly change people's lives, including relationships, communications, transactions, data collection, decision-making. Changes in IT lead to innovation, new business models and services. Change management and how people deal with it has gained attention across various fields. Finding effective ways for managing the process of changes is key to success in a highly competitive/global business environment.

Topics covered include:

- Information systems and organisational change management
- Leadership, education/training and individual development
- Information system project management, software version control/management
- Global dimension, methodologies/strategies/innovation
- Information systems integration process and management
- Tools for, and managing risk in, change management
- Measuring change management, cost analysis and economics
- TQM, six sigma for performance improvement
- Business process reengineering, information systems consulting/outsourcing
- Security, quality, social, cultural, legal, ethical issues
- Human resource/information technology/supply chain management
- Enterprise resource planning (ERP), enterprise application integration (EAI)
- E-business/m-commerce, internet/organisational change, best practices, standards
- Knowledge management, business intelligence/process management
- Software version control and management
