# Scope of the Journal

ISSN: 2052-8477 (Print), ISSN: 2052-8485 (Online)

*Emerging and evolving systems are integrating intelligent attributes to enable the thrust towards making technology adaptive and functional as an aid to improve existing designs. IJISDC, an international peer-reviewed journal, promotes discussion on the design and implementation of intelligent systems related to emerging areas of communication, computer vision, human-computer interaction, soft computing and related issues. The journal offers an applied approach driven by innovation, to facilitate intelligent design and implementation.*

## Contents

IJISDC publishes original papers, review papers, technical reports, case studies and book reviews. Special issues devoted to important topics in related design and technology areas will occasionally be published.

### Topics covered include:

- Intelligent systems design
- Composite systems design in communication and computing
- Soft-computational applications in communication and upcoming networks
- Computer vision, AI applications
- Computational geometry
- Signal/image processing
- Image matching, medical imaging
- Pattern/face recognition
- Architecture, languages
- Parallel computer vision
- Cognition
- Robotics, multi-sensor data fusion
- All areas of communication
- All areas of intelligent computing
