

International Journal of

Instrumentation Technology

Scope of the Journal

IJIT is a fully refereed international journal which presents the latest developments to assist researchers in various industries, institutes, R&D labs and policy makers working in the field of engineering and automation technology. IJIT publishes modelling, simulation, design, and implementation aspects of measurement and control technology-related original papers, review papers, technical notes and correspondence. Applications papers may not necessarily involve novel theory, but those which describe new realisations of established methods for measurement and instrumentation which compare various designs are covered along with the latest research including theoretical papers which discuss the applicability of original ideas which engender new theoretical applications.

Subject coverage:

Suitable topics include, but are not limited to:

- Fundamentals of instrumentation and control components
- Transducer principles and measurement techniques
- Computational electromagnetics and EMC
- Metrology and the theory of measurement
- Signal processing techniques for measurement and sensor-actuator systems
- Industrial networks and communication protocols
- Signal conditioning, data acquisition systems and telemetry
- PLCs/SCADA/DCS/automation
- Mechatronics, including smart sensors and MEMS
- Biomedical instrumentation
- Remote engineering and virtual instrumentation
- Recent developments in automation and control

Content of Inaugural Issue of IJIT

VOL. 1(1), 2011

Metrological characterisation of power quality measurement stations: a case study

Edoardo Fiorucci; Giovanni Bucci; Fabrizio Ciancetta

Prediction and comparison of emitted radiation from a flat plate heat sink using linear regression analysis with artificial neural network and ANFIS

S. Manivannan; S. Prasanna Devi; R. Arumugam; S. Paramasivam; N.M. Sudharsan

Rapid evaluation of the extent in micro-degradation of protective coatings using laser-ablation inductively coupled plasma mass spectrometry (LA-ICP-MS)

S.C. Fok; Avin E. Pillay; Sasi Stephen; Amr Abd-Elhameed

Design of an improvised tipping bucket rain gauge for measurement of rain and snow precipitation

Rajiv Kumar Das; Neelam Rup Prakash

Vibration control of mechanical suspension system using LabVIEW

Kothandaraman Rajeswari; Ponnusamy Lakshmi

Low cost digital measurement system for determination of temperature rise in dry type transformer

M. Srinivasan; S. Paramasivam; A. Krishnan

Development of caster slag detection system through imaging technique

Biswajit Chakraborty; Billol Kumar Sinha

Notes for Authors and Submission of Papers

Submitted papers should not have been previously published or be currently under consideration for publication elsewhere.

All papers are refereed through a double-blind process. A guide for authors and other relevant information for submitting papers are available on the Submission of Papers section of the Inderscience website: please go to

Author Guidelines

(www.inderscience.com/guidelines)

To submit a paper, please go to

Submission of Papers

(<http://www.inderscience.com/papers>)

ALL PAPERS MUST BE SUBMITTED ONLINE. If you experience any problems submitting your paper online, please contact submissions@inderscience.com, describing the exact problem you experience.

(Please include in your email the title of the Journal)
