Scope of the Journal

ISSN: 1741-5373 (Print), ISSN: 1741-5381 (Online)

IJLEG addresses the development and application of logistics in the world economy and globalised arena. With increased complexity and competition in today's and tomorrow's supply chain and extended enterprise, logistical systems and technologies play critical roles in ensuring the flow of tangible and intangible goods and information in production networks. The economics perspective in this context calls for improved performance assessment, evaluation and modelling of such logistical systems, evolving around issues related to human capital, intellectual capital and knowledge capital.

Topics covered include:

- Logistics information systems, enterprise/distribution networks, economics
- Purchasing and procurement, transportation/warehouse management
- Logistics and transportation optimisation and global logistical networks
- Outsourcing/off-shoring, third party logistics, reverse logistics
- Enterprise resource planning and ERP/II, and the extended enterprise
- Emerging/mobile/connective technology, RFID/EDI for logistics performance
- Logistics network security, uncertainty/risk in a globalised supply network
- Real-time and web-based logistical operations
- Data mining global supply chains, data exchange standards, e.g. RosettaNet
- Supplier relationship management, customer relationship management
- Business to business/consumer, business intelligence, knowledge management
- E-procurement, e-commerce, e-business and e-organisation
- Global supply chain management, demand chain management
- Order fulfilment and quick response in a globalised network
- Strategic alliances/partnerships, knowledge/technology transfer
