International Journal of

LIABILITY AND SCIENTIFIC ENQUIRY

Scope of the Journal

ISSN: 1741-6426 (Print), ISSN: 1741-6434 (Online)

IJLSE proposes and fosters discussion on the application of scientific knowledge to litigation, adjudication, legislation and public policy, with emphasis on the implications that informed interpretation of science exert on policy choices. IJLSE serves as a vehicle for exploring systematic approaches to scientific evidence in specific disputes. The journal is particularly interested in issues involving medicine, ecological analysis and risk assessment, and "critical appraisal" (as applied in health care sciences) to assist courts, administrative agencies, and policymakers.

Topics covered include:

- Rules of evidence and admissibility of scientific evidence in law and litigation
- Comparative tort law, e.g. strict liability vs. negligence, product liability standards
- Application of specific sciences in litigation (e.g. epidemiology)
- Risk assessment and public policy
- Legislation and how evidence shapes the law-making process
- Environmental law and policy
- Ethics and standards in litigation support
- Expert witness norms and standards
- Administrative proceedings
- Scientific issues in international trade and trade policy
- Damages calculations
- Digital evidence
