Scope of the Journal

ISSN: 1752-6582 (Print), ISSN: 1752-6590 (Online)

IJOSM covers the business and government management aspects of ocean systems and activities, including ocean transportation, marine resource development, environmental management, public policy and ocean use, ocean mining, ports, ocean energy and fisheries. It particularly encourages work that successfully integrates theory, methodology and experience in the fundamental disciplines that constitute the ocean systems management area, such as engineering, economics, business administration, operations research, public policy analysis and law.

Topics covered include:

- Ocean systems/project management
- Ocean transportation, short sea shipping, passenger ferry management
- Marine resource development
- Environmental management, regulations/policy for the ocean environment
- Public policy and ocean use
- Ocean mining
- Maritime economics and business, ocean systems economics
- Technological innovation in shipping/ports, satellite applications
- Oil spill management
- Ship power quality
- Floating wind field management
- Sea wings and sea plane management
- Intermodal systems
- Knowledge-based policies/education, knowledge transfer in shipping firms
- Fisheries
