Scope of the Journal

ISSN: 1757-1154 (Print), ISSN: 1757-1162 (Online)

IJPEC highlights the latest trends in research in the field of power generation, transmission and distribution. Currently there exist significant challenges in the power sector, particularly in deregulated/restructured power markets. A key challenge to the operation, control and protection of the power system is the proliferation of power electronic devices within power systems. The main thrust of IJPEC is to disseminate the latest research trends in the power sector as well as in energy conversion technologies.

Contents

IJPEC publishes original papers, review papers, technical reports and case studies. Special Issues devoted to important topics in power system and energy conversion will occasionally be published.

Topics covered include:

- Power system modelling and analysis
- Computing and economics
- FACTS and HVDC
- Challenges in restructured energy systems
- Power system control, operation, communications, SCADA
- Power system relaying/protection
- Energy management systems/distribution automation
- Applications of power electronics to power systems
- Power quality
- Distributed generation and renewable energy sources
- Electrical machines and drives
- Utilisation of electrical energy
- Modelling and control of machines
- Fault diagnosis in machines and drives
- Special machines
