# Scope of the Journal

ISSN: 2052-868X (Print), ISSN: 2052-8698 (Online)

*Supply chains and business operations are the backbone for development and growth of organisations and nations. Today's uncertain, turbulent environments expose supply chains and business operations to risks/disruptions that can significantly damage organisations and economies. IJSCOR presents the latest research/developments in supply chain/operations resilience strategies, highlighting theoretical research with practical applications. Besides being a theoretical platform for the academic community, IJSCOR helps practitioners bridge the gap between supply chain and operations resilience theory and its effective deployment and application.*

## Topics covered include:

- Resilient supply chain management, operational resilience in industrial systems
- Reverse logistics, green supply, closed loop/knowledge-based supply chains, RFID
- Vendor/supplier selection, supplier development, purchasing management
- Disaster management
- Supply chain performance/optimisation/risk/decision making/support systems
- Responsive and reconfigurable supply chains and operations
- Materials, equipment and maintenance management in uncertain environments
- Global lean/agile supply chains and operations management
- Internal operations and systems re-engineering, improvement, optimisation
- E-commerce supply and operations management, aggregate planning, ERP, MRP, JIT
- Resilient strategic thinking and implications, organisational resilience
- Modelling, risk analysis and risk management
- Education and training
- Quality management (e.g. business excellence models, six sigma, TQM, SPC, etc.)
- Empirical research and case studies
