Scope of the Journal

ISSN: 1742-7568 (Print), ISSN: 1742-7576 (Online)

IJSCPM aims to improve the state-of-the-art of worldwide research in the areas of satellite systems, networks, components, policy, management and services by publishing high-quality papers in this area, and by exposing readers to the various methodologies, tools, techniques, algorithms, results and applications involved.

Topics covered include:

- Satellite/deep space communication systems, networks/networking
- Multimedia mobile broadcasting, digital television
- Galaxy-scale satellite communications and exploration missions
- Earth stations/terminals, payloads, launchers/components, nanosatellites/rockets
- Remote sensing, radar/sonar, RF/microwave techniques
- Antennas, propagation, interference
- Enabling technologies: coding/modulation/signal processing, etc.
- Delay tolerant networking, fade countermeasures
- Protocols design, performance analysis, IP over satellite, QoS support
- Radio resource management
- Electronic warfare target location systems, military applications
- Mobile/broadcast/navigation/fixed services
- Security, privacy, trust, standards and regulation
- Service provision, marketing, economics, business aspects
- Network management/control, policy/management issues

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijscpm where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out about how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.

This title is part of the Computing and Mathematics Collection (see www.inderscience.com/cm). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
