# Scope of the Journal

ISSN: 1756-5804 (Print), ISSN: 1756-5812 (Online)

*At the beginning of 21st century the sustainability concept was mainly a basis for developing policies consistent with a continued use of resources into the future without causing environmental crisis. But the situation has evolved, and the global economic crisis in 2009 was the ultimate consequence of short-term economic thinking. We need a new form of economic development, addressing the needs of the present without undermining the needs of the future. IJSE addresses sustainability issues within economic theory and analysis.*
