Scope of the Journal

ISSN: 1748-0698 (Print), ISSN: 1748-0701 (Online)

IJSISE covers theoretical, experimental and applied aspects of the engineering design of signal and imaging systems, with emphasis on signal generation and image formation mechanisms, transmission, sensing, analysis and processing, and post-processing algorithms. IJSISE provides the interface between basic research, algorithms and techniques in signal and image processing/analysis/transmission on one side and integral systems on the other. State-of-the-art systems analysis, design, integration, evaluation, standardisation, and the development of algorithms evaluated towards building such systems are the journal's primary focus.

Topics covered include:

- Signal Systems Engineering
 - Signal systems
 - Signal processing
 - Technologies
 - Multimedia content processing
 - Multimedia data compression
 - Multimedia systems
 - Metadata and media abstracts
- Imaging Systems Engineering
 - Detectors and image formation
 - Image system design, image instrumentation/measuring techniques
 - Nanoimaging, molecular nanophotonics
 - Emerging detection/imaging technologies
 - Linear and nonlinear techniques for image processing
 - Applications

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijsise where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via e-mail or RSS
- View editorial board details
- Find out about how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.

This title is part of the Science, Engineering and Technology Collection (see www.inderscience.com/set). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
