# Scope of the Journal

ISSN: 1740-2123 (Print), ISSN: 1740-2131 (Online)

*Simulation and process modelling provides a better understanding of a set of interrelated activities that interact to achieve an optimised result and evaluate the effect of process changes, e.g. demand, resources, supply and constraints. IJSPM is a fully refereed publication of original, innovative, theoretical and application-based research on simulation and process modelling issues, providing an international forum for high-quality papers discussing the modelling, simulation and optimisation of processes in the entire life cycle of social, economic, science and engineering systems.*

## Topics covered include:

- Theory, methodology, techniques, tools
- Modelling and simulation of
  - Business processes, manufacturing and production processes
  - Healthcare/service/administrative/public sector processes
  - Supply chains and transport
  - Built environment, mechanics and metallurgical processes
- Verification and validation, simulation life-cycle evolution
- Service and component-based composition and integration
- Reengineering processes
- Big data processing, cloud computing and semantics
- Recent developments, distributed simulation
- Performance optimisation through simulation
- Educational and training approaches, case studies and curricula
- Simulation in collaboration environments
- Simulation standards and languages

## Not sure if this title is the one for you?

Visit the journal homepage at [www.inderscience.com/ijspm](http://www.inderscience.com/ijspm) where you can:

- View sample articles in full text HTML or PDF format
- Sign up for our free table of contents new issue alerts via email or RSS
- View editorial board details
- Find out how to submit your papers
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at [www.inderscienceonline.com](http://www.inderscienceonline.com) or download an order form from [www.inderscience.com/subform](http://www.inderscience.com/subform).

This title is part of the Computing and Mathematics Collection (see [www.inderscience.com/cm](http://www.inderscience.com/cm)). For library collection subscriptions or for a free institutional online trial, please contact [subs@inderscience.com](mailto:subs@inderscience.com).
