Scope of the Journal

ISSN: 2052-3556 (Print), ISSN: 2052-3564 (Online)

IJSTMIS is an international peer-reviewed journal covering innovative research and practice in the rapidly advancing area of computer science related to new generations of information systems. Taking a multidisciplinary approach, IJSTMIS encourages both fundamental and applied research papers that report on activities related to new research and development at the interface of spatial, temporal and multimedia studies as well as associated fields.

Topics covered include:

- Geographic information systems
- Temporal systems, real-time systems
- Multimedia systems, techniques, simulation, database management
- Spatio-temporal data management and modelling
- Query languages, temporal and spatial data mining and data warehousing
- Mobile/nomadic computing, mobile systems, moving objects
- Pervasive and ubiquitous computing
- Hardware and software solutions for spatial, real-time and multimedia systems
- Real-time applications, intelligent transport
- E-technologies and mobile technologies
- Semantic information systems
- Human-computer interfaces
- Geomatics, spatial analysis, spatial decision aids
- Environmental sciences, regional development, natural resources management, etc.
- New generations of information systems

Not sure if this title is the one for you?

Visit the journal homepage at www.inderscience.com/ijstmis where you can:

- Read about the journal's aim, scope and readership
- View editorial board details
- Find out about calls for papers and how to submit
- Find out about subscription options, in print, online or as part of a journals collection

You can order online at www.inderscienceonline.com or download an order form from www.inderscience.com/subform.

This title is part of the Computing and Mathematics Collection (see www.inderscience.com/cm). For library collection subscriptions or for a free institutional online trial, please contact subs@inderscience.com.
