# Scope of the Journal

ISSN: 1758-7328 (Print), ISSN: 1758-7336 (Online)

*Structural engineering is commonly considered a speciality within civil engineering, but it also includes any discipline which has a structural system. This field includes the analysis, design, plan, and research of structural components and structural systems. IJStructE is set up to report the relevant generic studies in this field.*

## Contents:

IJStructE publishes original papers, review papers, technical reports, book reviews, commentaries, and news. Papers on theory, experiment, design, etc., are published and it is expected that many papers will contain aspects of all three. Special Issues devoted to important topics in structural engineering will be occasionally published.

## Topics covered include:

- Analytical/design methods
- Blast engineering
- Bridges, tall buildings
- Case studies
- Fire engineering
- Infrastructure engineering
- Innovative structures
- Life assessment/durability
- New construction materials
- Repairs, strengthening, maintenance
- Structure-fluid-soil interaction
- Structural health monitoring, safety, reliability
- Testing technologies
- Vibration, impact/structural dynamics
- Wind/earthquake engineering
