# Scope of the Journal

ISSN: 1741-1084 (Print), ISSN: 1741-1092 (Online)

*The realisation of wireless connectivity is bringing fundamental changes to telecommunications and computing and profoundly affects the way we compute, communicate and interact. It provides fully distributed and ubiquitous mobile computing and communications, thus bringing an end to the tyranny of geography. IJWMC addresses the state-of-the-art of all aspects of wireless communications and mobile computing.*

## Contents:

IJWMC is a refereed international journal that provides an international premier channel to report, discuss and exchange theoretical contributions (including new techniques, concepts, and analyses) and practical contributions (including system experiments and prototypes, and new applications), work-in-progress, experience, case studies, and trend-setting ideas in the field of wireless communications and mobile computing as well as potential future directions and issues. High calibre tutorial expositions and survey reports of permanent reference value are also welcome. Research papers should be of a quality that represents the latest technical developments of wireless communications and mobile computing in devices, hardware, software, communications, architecture, networks, systems, algorithms, service and applications that support the symbiosis of wireless communications and mobile computing.

## Topics covered include:

- Hardware support
- System architectures
- Services and system support
- Algorithm/protocol design and analysis
- Mobile environments
- Applications
- Wireless communications and networks
- Education and training
- Emerging and non-traditional topics
- Computational modelling
